

Experiment -7
STUDENT MARK LIST

Aim

To create a simple **Payroll Processing System** using **Zoho One** as a cloud-based **Software as a Service (SaaS)** application..

Procedure

1. Log in to the Zoho One cloud platform.
2. Open Zoho Creator from the Zoho One applications.
3. Create a new application named **Payroll Processing System**.
4. Create a new form for employee payroll details..
5. Add the required fields: Name of the Student, Register Number, Subjects, Marks, Average, Percentage, Rank, and Overall Performance.
6. Configure the field types according to the data required.
7. Design and arrange the form for easy user interaction.
8. Save and publish the form.
9. Enter sample student mark details into the form.
10. Submit the form and verify that the entered marks and calculated result information are stored in the cloud.
11. Test the application by entering different student marks.
12. Verify that the **Payroll Processing System** works successfully as a SaaS application..

Implementation Input:

The screenshot shows the 'PAYROLL PROCESSING' form in the V.SALMAN application. The left sidebar contains a menu with options: Book a Cab, Property Buying & Rental System..., Library Book Reservation Systems, Mark Sheet Processing System, Student Mark Lists, PAYROLL PROCESSING (selected), and PAYROLL PROCESSING Report. The main form area is titled 'PAYROLL PROCESSING' and contains the following fields:

- EMP ID: A text input field with a placeholder '#####'.
- Name: Two text input fields for 'First Name' and 'Last Name'.
- BASIC SALARY: A text input field with a placeholder '#####'.
- DA: A text input field with a placeholder '#####'.
- HRA: A text input field with a placeholder '#####'.
- CCA: A text input field with a placeholder '#####'.
- PF: A text input field with a placeholder '#####'.
- IT: A text input field with a placeholder '#####'.
- LOP: A text input field with a placeholder '#####'.
- GROSS SALARY: A text input field with a placeholder '#####'.
- NET SALARY: A text input field with a placeholder '#####'.

A 'Submit' button is located at the bottom of the form.

Output:

The screenshot shows the 'PAYROLL Report' in the V.SALMAN application. The left sidebar is the same as in the input form. The main area displays a table with the following data:

Name	DA	BASIC PAY
SALMAN V	9000	50000

Below the table, there is a detailed breakdown of the payroll components for the selected record:

Component	Value
Name	SALMAN V
DA	9000
BASIC PAY	50000
IT	5000
HRA	6000
CCA	1500
GROSS SALARY	66500
LOP	0
PF	3000
NET SALARY	58500

At the bottom of the breakdown, there is a link to 'Add a comment'.

Result

Thus, a Mark Sheet Processing System was successfully created using Zoho One and demonstrated as a Software as a Service (SaaS) application. The required fields were entered, the sample record was submitted, and the stored output was verified in the cloud
