

Experiment -4

Library Book Reservation System (SIMATS Library) Using Zoho One (SaaS)

Aim

To create a simple Library Book Reservation System for the SIMATS library using Zoho One as a cloud-based Software as a Service (SaaS) application

Procedure

1. Log in to the Zoho One cloud platform.
2. Open Zoho Creator from the Zoho One applications.
3. Create a new application for the Library Book Reservation System.
4. Create a new form named Library Book Reservation.
5. Add the required fields: Student Name, Author, Publications, Year, Edition, Number of Copies, Rack No, and Status (Taken/Returned).
6. Configure the field types according to the data required.
7. Design and arrange the form for easy user interaction.
8. Save and publish the form.
9. Enter sample SIMATS library book reservation details into the form.
10. Submit the form and verify that the entered record is stored in the cloud.
11. Test the application with different books and reservation statuses.
12. Verify that the Library Book Reservation System works successfully as a SaaS application.

Implementation Input:

The screenshot shows the 'Library Book Reservation System' input form. On the left is a dark sidebar with the 'V.SALMAN' logo and navigation links: 'Book a Cab', 'Property Buying & Rental System...', 'Library Book Reservation Systems' (expanded), 'Library Book Reservation System' (selected), and 'All Library Book Reservation Systems'. The main form area has the following fields: 'Name' (split into 'First Name' and 'Last Name'), 'Member Email', 'Book Title', 'Due Date' (with a date picker showing 'dd-MMM-yyyy'), 'Author Name' (split into 'First Name' and 'Last Name'), 'Return Date' (with a date picker showing 'dd-MMM-yyyy'), and 'Staff Assigned' (a dropdown menu showing '-Select-'). A blue 'Submit' button is at the bottom.

Output:

The screenshot shows the 'All Library Book Reservation Systems' table and a detail view. The table has columns for Name, Member Email, and Book Title. The detail view shows the following data:

Name	Member Email	Book Title
THARUN B	192525153.simats@saveetha.com	THE ENGINEER
SALMAN V	192525153.simats@saveetha.com	TECHNICAL ENGLISH

The detail view for the selected record (SALMAN V) shows the following fields:

Name	Member Email	Book Title	Due Date	Author Name	Return Date	Staff Assigned
SALMAN V	192525153.simats@saveetha.com	TECHNICAL ENGLISH	02-Oct-2026	JOHN K V	05-Oct-2026	saveethauniversity664

Result

Thus, a Library Book Reservation System (SIMATS Library) was successfully created using Zoho One and demonstrated as a Software as a Service (SaaS) application. The required fields were entered, the sample record was submitted, and the stored output was verified in the cloud
