

Experiment -5

Mark Sheet Processing System

Aim

To create a simple Mark Sheet Processing System using Zoho One as a cloud-based Software as a Service (SaaS) application.

Procedure

1. Log in to the Zoho One cloud platform.
2. Open Zoho Creator from the Zoho One applications.
3. Create a new application for Mark Sheet Processing.
4. Create a new form named Mark Sheet Processing.
5. Add the required fields: Name of the Student, Register Number, Subjects, Marks, Average, Percentage, Rank, and Overall Performance.
6. Configure the field types according to the data required.
7. Design and arrange the form for easy user interaction.
8. Save and publish the form.
9. Enter sample student mark details into the form.
10. Submit the form and verify that the entered marks and calculated result information are stored in the cloud.
11. Test the application by entering different student marks.
12. Verify that the Mark Sheet Processing System works successfully as a SaaS application.

Implementation Input:

The screenshot shows the 'Mark Sheet Processing System' input form. On the left is a dark sidebar with the 'V.SALMAN' logo and a menu containing: 'Book a Cab', 'Property Buying & Rental System...', 'Library Book Reservation Systems', 'Mark Sheet Processing System' (expanded), 'Mark Sheet Processing System', and 'Mark Sheet Processing System Report'. The main form area has the title 'Mark Sheet Processing System' and contains the following fields: 'Student Name' (split into 'First Name' and 'Last Name' text boxes), 'Student ID' (a dropdown menu showing '-Select-'), 'Subject Code' (a text box), 'Total Marks' (a text box with '#####' placeholder), 'Marks Obtained' (a text box with '#####' placeholder), 'Grade' (a dropdown menu showing '-Select-'), and 'Uploaded By' (a dropdown menu showing '-Select-'). A blue 'Submit' button is at the bottom right.

Output:

The screenshot shows the 'Mark Sheet Processing System Report' output. It features a table with columns for 'Student Name', 'Student ID', and 'Subject Code'. The table lists three students: PUNITH N, THARUN B.V, and SALMAN V. The 'SALMAN V' row is selected, and a detailed view of this record is shown on the right. This view includes fields for 'Student Name', 'Student ID', 'Subject Code', 'Total Marks', 'Marks Obtained', 'Grade', and 'Uploaded By', with their respective values.

Student Name	Student ID	Subject Code
PUNITH N	491700000000009010	CSA15
THARUN B.V	491700000000009005	CSA15
SALMAN V	491700000000009005	CSA15

Student Name	Student ID	Subject Code	Total Marks	Marks Obtained	Grade	Uploaded By
SALMAN V	491700000000009005	CSA15	500	452	A+	saveethauniversity664

Result

Thus, a Mark Sheet Processing System was successfully created using Zoho One and demonstrated as a Software as a Service (SaaS) application. The required fields were entered, the sample record was submitted, and the stored output was verified in the cloud
