HOSPITAL INFORMATION SYSTEM USING CLOUD (SaaS)

Aim

To create a simple cloud software application for **Hospital Information System for SIMATS Hospital** using any Cloud Service Provider to demonstrate SaaS..

Procedure

1. Log in to the Cloud Service Provider.
2. Create a new application for Hospital Information System.
3. Create a patient information form.
4. Add the required fields:
 5. Patient Name
 6. Age
 7. Address
 8. Phone
 9. Email
 10. Attender Name
 11. Attender Phone
 12. Doctor Name
 13. Disease
14. Configure the required field types.
15. Design and arrange the form.
16. Save and publish the application.
17. Enter sample patient information.
18. Submit the form and verify that the information is stored in the cloud.
19. Test the application with different patient records.
20. Verify the working of the Hospital Information System.

Implementation Input:

The screenshot shows the 'HOSPITAL INFO SYSTEM' form within the V.SALMAN application. The left sidebar contains a menu with options like 'Book a Cab', 'Property Buying & Rental System...', 'Library Book Reservation Systems', 'Mark Sheet Processing System', 'Student Mark Lists', 'PAYROLL PROCESSING', 'PAYROLL', 'Counselling Systems', and 'Hospital Info Systems'. The 'Hospital Info Systems' option is selected, showing a sub-menu with 'HOSPITAL INFO SYSTEM' and 'All Hospital Info Systems'. The main form area is titled 'HOSPITAL INFO SYSTEM' and contains the following fields:

- PATIENT NAME:** First Name (input field with 'I'), Last Name (input field).
- AGE:** Input field with '#####' placeholder.
- Address:** Address Line 1 (input field), Address Line 2 (input field).
- City / District:** Input field.
- State / Province:** Dropdown menu with '-Select-'.
- Postal Code:** Input field.
- Country:** Input field.
- Phone:** Input field with '+91' country code and '81234 56789' number.
- Email:** Input field.
- ATTENDER NAME:** Input field.
- ATTENDER PHONE:** Input field with '+91' country code and '81234 56789' number.
- DOCTOR NAME:** Input field.
- DISEASE:** Input field.

A 'Submit' button is located at the bottom right of the form.

Output:

The screenshot shows the 'All Hospital Info Systems' table within the V.SALMAN application. The table has columns for 'PATIENT NAME', 'AGE', and 'Address'. The data is as follows:

PATIENT NAME	AGE	Address
HALLT MS	25	KR, FDOVSGBS, CHITTOR, AP, 517425, India
JOHN A	45	KUPPAM, KUPPAM, CHITTOOR, ANDHRA PRADESH, 517425, India

The table is displayed in a modal view with a 'Show 2 of 2' indicator at the bottom. The right sidebar shows a list of fields for the selected patient (JOHN A):

- PATIENT NAME: JOHN A
- AGE: 45
- Address: KUPPAM, KUPPAM, CHITTOOR, ANDHRA PRADESH, 517425, India
- Phone: +916305766847
- Email: JOHNJ@gmail.com
- ATTENDER NAME: harit
- ATTENDER PHONE: +916305544556
- DOCTOR NAME: Dr. RAMESH BABU
- DISEASE: FEAVER

An 'Add a comment' button is located below the list of fields.

Result

Thus, a **Hospital Information System** was successfully created using a Cloud Service Provider and demonstrated as a SaaS application.
